

[P1] Brave soldiers keep peace

I. Answer questions

1. Why do people call peacekeepers Blue Berets or Blue Helmets?

2. When did China start to send soldiers to join UN peacekeeping missions?

3. How many soldiers has China sent to join UN peacekeeping missions?

4. How many missions have Chinese peacekeepers taken part in?

5. In 1992, China's first "blue helmet" troop went to Cambodia to help build a bridge. How long did it take them to finish building the bridge?

6. What do peacekeepers do?

[P3] What the world would be like if all the ice melted?

I. Fill in the blanks

1. Sea ice is mainly in the _____. This kind of ice is made of _____.

2. _____ is mostly in Greenland and Antarctica. This kind of ice is made of _____.

II. Choose the right answers

What will happen if ice melts? []

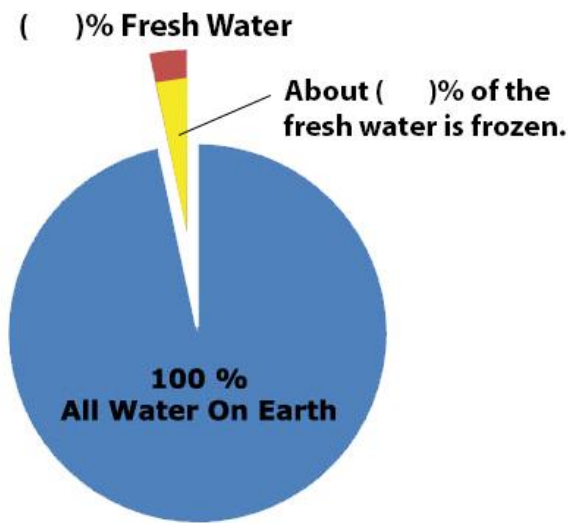

A. Some sea animals will have no home.

B. Sea levels will go down.

- C. Each day will be longer.
- D. Global temperatures will rise.
- E. Rivers and oceans will be polluted by poisonous chemicals from the ice.

III. Read and complete the chart

Only **3%** of water on Earth is freshwater, and **about 70% of that** is frozen. That's 30 million cubic km of ice. If you used it to build a 1,000-meter-thick wall, it would cover North America.

Answers:

[P1]

1. Peacekeepers wear light blue berets or helmets. So people call them Blue Berets or Blue Helmets.
2. China has sent soldiers to join UN peacekeeping missions since 1990.
3. China has sent over 40,000 soldiers to join UN peacekeeping missions.
4. Chinese peacekeepers have taken part in 25 missions.
5. It took them one day to finish building the bridge.
6. When there is a war or disaster, peacekeepers work to protect and help local people. Peacekeepers also build roads and houses.

[P3]

I.

1. Arctic, salt water
2. Land ice, fresh water

II. ACDE

III. 3%; 70%
