

**[P3] See the world like an insect!**

**I. True or false**

1. The camera can sit on the back of an insect. [       ]
2. The camera is as heavy as a playing card. [       ]
3. The camera doesn't need a battery. [       ]
4. With the camera on its back, the insect can only walk on smooth paths.  
[       ]

**II. Fill in the blanks**

1. Scientists use the camera to study the world of \_\_\_\_\_.
2. The viewing distance of the camera is a little longer than the length of a  
\_\_\_\_\_.
3. Scientists use the camera system to make the world's smallest  
\_\_\_\_\_.

**III. Choose the right answer**

1. The weight of the camera is \_\_\_\_\_.  
A. 250 kg        B. 250 g        C. 250 mg
2. The camera can take \_\_\_\_\_ pictures.  
A. black and white    B. color    C. blue and white
3. The camera can see \_\_\_\_\_ away.  
A. 120 meters    B. 240 meters    C. 360 meters
4. Which of these things does the camera NOT do?  
A. Show us the world of insects.

- B. Help us explore dangerous places.
- C. Save endangered animals.

**[P4/5] How much do you know about China's dinosaurs?**

**I. Circle the right answer**

1. About 200 (billion/million) years ago, lots of dinosaurs lived in China.
2. Dinosaur scientists spend most of their time working (in the wild/at home).
3. (Not all/All) dinosaurs were big.
4. (Birds/Dolphins) are the descendants of dinosaurs.

**II. Multiple choices**

Which of the following are TRUE about dinosaurs? [       ]

- A. Triceratops has a mouth like that of a duck.
- B. Some dinosaurs lived for as long as 100 years.
- C. Some dinosaurs can be as small as a human palm.
- D. Dinosaur eggs can be as large as basketballs.

**III. Fill in the blanks**

In 1938, Chinese scientist Yang Zhongjian found a dinosaur fossil in Lufeng, Yunnan. Yang named it “Lufengosaurus huenei”. It is about 2 meters tall and 6 meters long. It's the first and oldest dinosaur Chinese scientists found in China.

**IV. Answer the following questions**

1. How many kinds of dinosaurs have scientists found in China so far?

\_\_\_\_\_

2. Who found the first dinosaur in China? When and where did he find it?

\_\_\_\_\_

**V. Think and talk**

What kind of dinosaur do you like best? Do you want to be a dinosaur scientist when you grow up?

Answers

[P3]

- I. TFFF
- II. insects, soccer field, robot
- III. CAAC

[P4/5]

- I. million, in the wild, Not all, Birds
- II. BCD
- III. scientist, fossil, tall, long, oldest, China
- IV. 1. Scientists have found 332 kinds of dinosaurs in China so far.  
2. Chinese scientist Yang Zhongjian first found dinosaur in China. In 1938, he found it in Lufeng, Yunnan.
- V. -----
